ADD INS FOR MY WEBSITE

These are designed to quickly, easily and constantly update the website with new information.

Added items are noted under the specific topic heading where they would be entered in the website.

This process saves us **both** a great deal of time.

I do not have to go thru the website to find where the item should be entered.

If you have previously used the website, then you can just look at the “add ins” to see what new has been added.

Website addresses along with phone numbers in case the website is not in operation.

DVD's can be easily found on Amazon and some other sites just by the movie name alone.

Other related information is included as appropriate.

Also note – some of the items on this website are **local** to the Allentown, PA area and may be well known to local resident and others. However, many especially outside the area may not know of these items. That is why they are included here.

This is the same for other items with respect to those who already follow a particular topic. But those who are just getting into the topic may not know of them. That is why they are included here.

This should save a lot of time and frustration for beginners in their searching.

Please return the favor so that items not listed on this web site can be included. Thanks! Enjoy.

An aside – how sensitive those who run it are – many “**appreciation**” activities for those who served, especially in WW II – at one commemoration – many of the big bombers of that era were there for numerous extensive “flybys” – many veterans, now in wheel chairs due to advancing age, watched with tears in their eyes remembering those days and how they flew them – probably their last time - while family members videotaped it all, them included – many others also had tears in their eyes just watching it all.
