WHY GET A SPECIAL & UNIQUE KAYPRO "8" ?

Own a piece of working early computer history!

Experience what it was actually like to use a computer from the very beginning of really affordable, commercially available, portable, personal computers.

Compare and contrast it with what computing is today. Have some fun!

The first 1983 Kaypro II / 2 's and IV / 4 's were a very innovative and creative computers in the very beginning of the personal computer era, besides being way ahead of the time in many of their features!

The special and unique ***Kaypro "8"*** is a greatly updated and modified by commercially available, published and established methods, type of computer. It is a "homebrew" [modifications / updates made by owners] and not commercially available.

These updates and modifications were designed by respected and well established Kaypro dedicated organizations, in response to significant market demands. They were made by the owners of these Kaypros in order to try to keep these first Kaypros competitive for as long as possible, along with protecting their great investment in funds, time and other resources in these systems.
