## Other Publications

Frank J. Gadek

Although a very simple and inexpensive device, others made use of it and referenced this work –

- a] “Chemistry In Context: Applying Chemistry to Society,” by Stanitski and others.
- b] “ChemComments,” article by Gayle Lucian.
- c] Fisher Scientific made a version of it & offered it for sale in their catalog

Frank J. Gadek, “**A Commercially Available Electronics Device for Conductivity Experiments**,” J. Chem. Ed., **64**(3), 281-2 (1987).

It was modified and other suggested uses were proposed.

There was even an international inquiry to this article, my response and a response of Radio Shack.
