## **SWAP SITES**

[www.swapacd.com](http://www.swapacd.com). – if you do not know of it, in essence you send **CD's** people want to them at your expense – Media Mail is less than \$2 and then they can send you CD's you want at their expense of mailing – so in essence you can get CD's **for free**. However, these are only commercially available CD's and not the CD's you would make yourself of the specific music you like, that may not have ever made it to commercial CD's.

Related sites swap **DVD's** and **paperback & other books** in the same way [[www.paperbackswap.com](http://www.paperbackswap.com) and [www.swapadvd.com](http://www.swapadvd.com) – but the DVD one just started about a month ago]. I use the CD and paperback sites a lot to get things not still available commercially from normal sources, especially for my STS research. It is all handled by computer so few people are involved. They will automatically print out the mailing label and postage for you!!!

You can even get in some cases automatic delivery confirmation.

I am very pleased!
